**Amendment**

In response to the Official Action mailed November 24, 2006, kindly amend this application as follows:

**In the Specification**

Page 1, line 20 – page 2, line 11, rewrite as follows:

--- The current practice in façade construction is described in U.S. Patent No. ~~4,481,868~~ 4,581,868 to McCann, which is incorporated herein by reference, discloses mechanically fastening sections of glass panels to the supports of a building. That patented glass assembly comprises a planar array of sealed multiple glazing units each comprising two opposed spaced sheets with a seal between the sheets defining a sealed gas space, which units are secured to supporting members with the outer surface of the units sealed edge- to-edge, at least some of the units being secured to the supporting members by a mechanical fixing passing through the outer sheets of the units outside the
